

Features

- Radio buttons are cleared by clicking on them a second time.
- Rollback IEP tab at the end of the IEP Forms List will delete IEP just opened and “roll” you back to the prior IEP. Only use Rollback if you inadvertently started a new IEP.
- When selecting students the Search tab, far right of screen explains the Search features within netIEP.
- Select “Another IEP” Tab at the top of the Forms List, far right side, gives you access to work on the current IEP or start a new IEP.
- If a new IEP deletes a prior goal, remaining goal(s) will automatically re-number in numerical order.
- Available Students Tab for student’s IEP Search will list all students for which you are the service provider.
- Deactivated Students Tab lists all students in the system listed as deactivated.
- When a student is deactivated that student will still be on the case manager or service – provider list until you remove them from the service Provider List on the Student Record.
- Can also search for a student by name and grade especially if there is another student in the system with the same full name.
